YEHUDA AI DETECTORS

**MOUNTED GOODS ARE EASY FOR
YEHUDA AI. THE PERFECT DETECTIVE
HAS ARRIVED.**

**ANDROID
PHONE
INCLUDED!**

YEHUDA AI KNOWS Advanced AI Color Coded Results

- ✓ **DIAMONDS**
- ✓ **HPHT LAB DIAMONDS**
- ✓ **CVD LAB DIAMONDS**
- ✓ **CZ**
- ✓ **MOISSANITE**

- Loose diamonds are easy.
- Mounted goods are easy.
- YEHUDA AI automates stone identification:
 - Which stones are Natural?
 - Which are CVD lab grown?
 - Which are HPHT lab grown?
 - Which are Moissanite?
 - Which are CZ? *Yes! For the first time ever, positive ID of CZ's is now possible due to YEHUDA's exclusive PATENT PENDING technology.*
- A dedicated phone or tablet is included. You can also use your own Samsung phone. *(Most models)*
- **FACT—YEHUDA Sherlock Holmes 4.0 scored a 100% lab diamond detection rate on the ASSURE 2.0 independent testing, of course.**

SAME 100% DETECTION RATE TECHNOLOGY AS THE 4.0!

Quickly and accurately test all of the visible stones with just one click, and immediately view the results on the provided mobile phone or tablet!

YEHUDA's user interface is simple to use—with no calibration required or a need to change testing platforms. All results are automatically uploaded to the Cloud! Plus, you can add lab reports, appraisals, your customer's name and photo, SKU#, bar code, and any number of files or data to the test upload.

Store all the test results from multiple YEHUDA detectors under one account.

Download the App from Google Play! \$10 monthly subscription fee per account until 12/31/2025 *(then \$12.50)*. Include any number of detectors.

HUMAN DECISION IS NO LONGER REQUIRED, YEHUDA AI KNOWS

WATSON AI

- Loose diamond testing area of approx 1.5 x 2.5 inches
- Holds 8 rings
- Diamond testing height approx 1.5 inches (50cts)

GEMORO XRF GOLD & PRECIOUS METAL ANALYZERS

XRF ANALYZER A handheld, portable energy dispersive XRF Spectrometer designed for jewelers, pawnshops, appraisers, precious metals buyers, and manufacturers.

Manufactured in the USA, the **GEMORO XRF Analyzer** is top in its class and the best choice for your investment.

The **GEMORO XRF** is a handheld, portable Energy Dispersive XRF Spectrometer designed for jewelers, pawnshops, appraisers, precious metals buyers, and manufacturers. Users can benefit from this fast and efficient technology, quickly identifying and measuring each element in jewelry, coins, watches, and more. This easy-to-use, fast, and precise XRF is lightweight, yet rugged enough to use all day long.

X-ray Fluorescence or XRF is a non-destructive, analytical method used to determine elemental concentrations of various materials on the surface of what is being analyzed. It's important to recognize that not all XRF analyzers have the same capabilities.

Exclusive new advanced feature—**ROLEX 904L STAINLESS STEEL IDENTIFIER!** This easily identifies the unique stainless steel that is used in **ROLEX** watch cases and bands. This software update also distinguishes 304 and 316 stainless steel.

**XRF Features
Video**

**XRF Financing
Available Here**

The **GEMORO** XRF determines the percentage of each element, thoroughly measuring an area 1.5mm in diameter while reaching a robust depth. This state-of-the-art instrument represents a high-tech alternative to a destructive fire assay.

Each unit includes two 6-hour long-lasting rechargeable batteries and an AC adapter. The ability to set a passcode access parameter to manage user access. WIFI/Bluetooth/USB connection capabilities allow you to quickly send sample images and test results to your computer for easy filing. This feature-rich unit comes with a protective Pelican Case to ensure it arrives in perfect condition and enables you to carry it into the field.

DOCK & BARREL BENCH-TOP CONVERSION KIT

The bench-top docking station conversion kit firmly anchors the XRF device onto a table by connecting it to the dock, while securely positioning it upright. The easy and secure barrel firmly affixes the barrel to the XRF nose.

The transparent protective glass window on top of the barrel ensures that both the buyer and seller can view the testing process and view results in real-time. The dock and barrel provide the highest degree of confidence that there will be no risk of energy exposure.

GEMORO XRF PRO ANALYZER

The **GEMORO XRF PRO** Analyzer is our premium handheld, portable Energy Dispersive XRF Spectrometer model that uses an advanced SDD detector. The sleek new **GEMORO XRF PRO** Analyzer is the world's lightest, smallest, fastest, high-precision XRF analyzer under 3 lbs. This is especially beneficial when you're using it all day long.

It has all the features of the original **GEMORO XRF** Analyzer and more. It's designed for jewelers, pawnshops, appraisers, precious metals buyers, and manufacturers that demand the best. With gold over \$3,000 per oz, this is the time when you'll want to benefit from the efficient, super-fast, non-destructive technology that's used in the **GEMORO XRF PRO**.

- Quickly identify & measure each element in jewelry, coins, watches, & more
- **Lightning-fast, non-destructive and even more precise than the X-50**
- Intuitive interface
- **Smallest & lightest handheld model**
- Premium advanced X-ray tube with SDD detector
- **Advanced plating detection update (available soon)**
- Built on Android OS with Wi-Fi, Bluetooth, GPS & USB
- Manage your data anywhere, print or email results, & connect to virtually any information management system for seamless precious metals test data & reports
- Integrated camera with video for sample viewing, & the latest smartphone display provides easy viewing in all lighting conditions
- **CRYSTAL CLEAR DISPLAY: Superior 2.7-inch color capacitive touchscreen, 400 MHz Qualcomm Adreno 306 2D/3D graphics accelerator; rear-facing display for easy results viewing, readable in all conditions**
- **SAMPLE VIEWING:** Internal high-resolution camera for sample viewing & targeting for welds, etc.; second macro-camera for photo documentation, reading & storing 2D/3D barcodes & QR codes
- **SECURITY:** Password protected usage (user level) & internal settings (admin)
- Fully portable, rechargeable Li-ion battery or AC powered
- Includes protective Pelican Case for storage/transportation
- May be used with **DOCK & BARREL BENCHTOP CONVERSION KIT** Item #PMX-5677

GEMORO ASSAY LAB

DESKTOP XRF ANALYZER

The NEW **GEMORO ASSAY LAB** is a portable desktop XRF Energy Dispersive Spectrometer precious metal analyzer, that is proudly made in the USA. It features a premium SDD detector, which is the most advanced and accurate type available. The compact, sleek, ergonomic design fits comfortably on a desk or counter and has a bright touchscreen, full color display.

The **GEMORO ASSAY LAB** is the perfect solution for analyzing precious metals and it's ideal for jewelers, pawn shops, jewelry manufacturers, appraisers and precious metal scrap buyers.

Users can benefit from this fast and efficient, safe, non-destructive technology that produces surface test results that are comparable to a fire assay without destroying the jewelry. Quickly identify and measure each element in jewelry, coins, watches, and more.

- Super-fast, non-destructive & precise
- Intuitive interface
- Autonomous & PC operation
- Advanced plating detection
- Measures 24 different elements
- Compact, sleek & ergonomic design comfortably fits on a desk, bench or counter
- Large 7" touchscreen full color display
- Fully portable battery or AC powered
- Built-in handle for transporting
- Proudly designed and made in USA

**SUPERIOR TECHNOLOGY.
STRONGER POWER.
GREATER DURABILITY.
LONGER WARRANTY.
ACCESSORIES INCLUDED.**

Known for producing the jewelry industry's best ultrasonics for decades, the engineers at **GEMORO** keep outdoing themselves with their NEXT-GEN 1.5PTH and 2QTH, plus the new NEXT-GEN 2 3QTH PRO models.

You're in control with **GEMORO**. Featuring two intense cleaning powers at the flip of a switch. Turbo Sweep Technology™ for the toughest jobs and Power Sweep Technology™ for more delicate jewelry. Simply put, **GEMORO** ultrasonics clean jewelry faster and more effectively than ever before. The exclusive Instantaneous Digital Degassing (IDD) speeds up the cleaning process and the Automatic Load Self-Tuning (ALST) constantly adjusts to the maximum cleaning output and load voltage, to maintain consistent cavitation and cleaning regardless of load and liquid levels. The thermostatically controlled VARI-TEMP 2™ silicon heaters last even longer and heats up the tank in a fraction of the time and may be adjusted as you like. Change the cleaning time from 0-60 minutes with its fully adjustable timer, no problem.

Wait, you can now have even greater control with the new **GEMORO** 3QTH PRO. This larger model's sleek design has LED bar graph indicators for both its heater and timer, and it has easily adjustable variable control knobs. Boasting the quietest ultrasonic in its class, **GEMORO's** proprietary sound dampening insulation cuts the inherently loud ultrasonic sound to a fraction of others!

GEMORO's ultrasonics look great, too. Brushed stainless steel cabinets and tanks resist rust and damage from harsh chemicals and heat, ensuring years of reliable use.

Only **GEMORO'S** ultrasonics include everything you need, since they come with both stainless steel baskets, ring racks (except 1.5PTH), and tweezers.

Don't get soaked—BEWARE OF CHEAP IMITATIONS!
Order your premium GEMORO Powerful Ultrasonics today!

INNOVATOR IN ELECTRONICS

SMALL SIZE BIG PROFITS!

Promote your watch battery replacement service and boost store traffic 17% while generating \$43,000 a year in profits!

Most watch batteries are easy to replace, and on average, cost less than \$1.00. With installation, they are typically sold by jewelers for \$12.50 or more. Build customer confidence by offering the world's leading watch battery brand, Murata!

Murata watch battery starter kits include everything you need: an assortment of the most popular watch batteries, battery change instructions and training video created by the American Watchmakers–Clockmakers Institute, Murata's 60-drawer organizer display featuring our exclusive popularity scale and cross-referenced drawer label set, and all the necessary tools, *including*:

- Multi-Battery Tester with Leads
- Snap Back Knife and Large Screw Back Wrench Case Openers
- Assorted Flat-head and Phillips Screwdrivers
- Murata Watch Battery Size Selector
- Plastic and Fine-point Metal Tweezers
- Spring Bar Tool and Assorted Spring Bars
- Watch Band Link Pin Remover & Extra Pins
- Hammer with Plastic and Metal Heads
- Watch Bracelet Band Strap Support Tool Holder
- Watch Case Vise
- Rubber Gasket Assortment
- Watchmakers Eye Loupe
- Inventory Control System
- Murata Cross Reference Guide
- Battery Recycling Container
- Four stickers for windows/cabinets

VIEW OUR MURATA BATTERY VIDEO

- Sony / Murata invented the 0% Mercury Silver Oxide battery in 2004.
- All Silver Oxide and Alkaline batteries are Mercury Free and produced in Japan.
- Lithium batteries have always been Mercury Free.
- All Murata Lithium batteries size CR1632 or smaller are produced in Japan; all larger CR types are produced in Indonesia.
- All Murata Alkaline batteries are produced in Japan and are often trusted for use as original equipment in watch applications.
- Every Sony / Murata 5-piece Strip is marked with a UPC for that battery type.
- Sony / Murata was the world's first battery producer to offer child resistant strips of 5 batteries.
- Murata battery packaging is designed to help prevent medical injuries and loss of life from accidental ingestion.
